

# Trust us to protect your business

## For Intruder Alarms, Access Control, Door Entry, CCTV Surveillance

As an accredited NSI Gold installer, Network Security and Fire believe the best protection against crime is crime prevention, and one of the best ways to prevent a crime is to install a sophisticated security system.

From the simplest of alarm systems or upgrades to custom designed IP integrated security, incorporating the latest technology, Network Security and Fire can provide round the clock protection for your business, 365 days a year.

Network Security and Fire has vast experience in planning and installing security and DDA compliant systems in an extensive range of premises from small commercial property to large-scale public buildings, schools and university halls of residence.

Whatever the premises, Network Security and Fire can offer a solution to suit any requirement and budget.

- ▶ Design ▶ Installation ▶ Maintenance ▶ Monitoring

Only 1 in 20 businesses have a security system in place

Keeping you and your business safe from harm

# Trust us to protect your business

## Three-quarters of businesses that suffer a serious fire do not recover...

Utilising the latest technology, Network Security and Fire can offer proposals to install fully integrated, addressable and conventional fire alarm systems and detection systems; all compliant with the current regulations and standards.

Every installation is backed up by a maintenance package, ensuring the equipment meets with current safety standards and prevents future failure or faults.

Whether the property is a new build, a speculative office, a grade II listed building, renovation, or an industrial unit or park, we have the ability and expertise to deliver a solution to suit your requirements.

Fire safety is an area that demands the very highest levels of service and delivery. Let Network Security and Fire's knowledge and experience be your safeguard.
